As part of his visit to Turkmenistan, Firudin Gurbanov, Deputy Minister of Science and Education, met with the country's deputy ministers of education.

During the meeting, the parties exchanged views on the recent education reforms implemented in both countries. They discussed the results achieved; existing challenges, proposals for addressing them, and prospects for further cooperation in the field of education.

The Deputy Minister emphasized the importance of further developing educational cooperation between the two countries, placing particular emphasis during the meeting on discussions regarding the increased use of modern technologies, including artificial intelligence, in education.
