The Minister of Science and Education Emin Amrullayev held a meeting with Tan Tianwei, the rector of Beijing University of Chemical Technology (BUCT), who visited our country.

The meeting focused on the future directions of science and higher education, including research activities, in collaboration with BUCT.

During the meeting, the parties exchanged views on the dual-degree programs between Baku Engineering University (BEU) and BUCT in six fields of study, and highlighted the prospects for expanding this cooperation to include new fields and areas of study.

At the same time, it was noted that the recently established "Faculty of Engineering," in collaboration with BUCT in BEU, is of particular importance for the development of educational ties between the two countries.
