The Minister of Science and Education Emin Amrullayev spoke at the 2nd Ministerial Meeting ‘One Belt, One Road’ on Science, Technology and Innovation at the 2nd ‘One Belt, One Road’ Science and Technology Exchange Conference held in Chengdu, People's Republic of China.

In his speech, the Minister of Science and Education spoke about the work carried out by the Republic of Azerbaijan and the planned activities to promote international scientific cooperation and innovation-oriented development, as well as the creation of a knowledge-based economy.

He noted that cooperation between the two countries in the fields of science, education and technology has been identified as a strategic priority for the Republic of Azerbaijan, and emphasized that strengthening joint research, technology transfer and human capital exchange with the People's Republic of China in key areas such as artificial intelligence and clean energy will make an important contribution to strengthening bilateral relations.
