
In order to organize distance education-teaching process, the Ministry of Education has created an opportunity for the free use of "Microsoft Teams" platform on higher and secondary education levels.

Video-instructions for teachers and students on using the platform have been prepared and posted on the video lessons portal (video.edu.az).

The platform will provide a wide range of opportunities to educational institutions. By using the platform the educational institutions will be able to provide distance teaching via video connection, to use interactive tools to organize teacher-student discussions, to transfer various lesson materials such as syllabus and lectures, as well as larger materials, to plan online lessons through calendar tool, to organize group works and use assessment tools.
