

---

Illham Pirmammadov, Director of the Apparatus, gave information on the main activities of the Apparatus, its structure and allocations of staff duties. He noted in the last year, there were implemented works to establish the cooperation between departments of the Ministry, and prepare, discuss and conclude documents of the Ministry and order's projects. Moreover, the relevant works were done to implement the control over the execution of the unified state education policy and education legislations at private universities. Furthermore, illegal educational institutions were identified and closed down in the last year. According to him there were prepared about 40 legal documents in accordance with the Education Law, and they were discussed and executed after being agreed with the relevant ministries.

According to information given by him, in 2010, there were held six meetings of the board, and prepared the relevant order within the execution of the board's decisions and distributed to the appropriate bodies. I. Pirmammadov also informed on the current situation existing at general and pre-school educational institutions, and talked about students, teachers and pedagogical staff. He also spoke about the execution of the plan for admission of students to universities, detecting fake educational documents and their abolishment in the prescribed manner.

Moreover, he talked about learning the demand for the state educational documents of educational institutions, their generalizations and organization of their order. In addition he noted writing of the "History of the education" book, works done within the execution of the project on "Coryphaeus of the Azerbaijan national education."

Further, he gave a presentation on works done by the departments for Recognition of educational documents, Pre-school education, Law, as well as Special Department in 2010. He gave information on activities of the Department for recognition of educational documents and noted that documents received by the department have been considered by the Expert Group. According to him, there was prepared the special computer program on recognition of educational documents. He also gave information about works that had been done in the field of mutual recognition of diplomas, responsibilities and functions of the pre-school education department, newly built and reconstructed kindergartens. Talking about distribution of 39 learning materials published by the order of the Ministry to pre-school educational institutions, execution of the appropriate program and projects, as well as planning works, P. Pirmammadov underlined measures implemented by the Special Department and Department for Law to execute the documents, and relevant issues.

Questions on the report were answered at the end.
