

---

In the 2021/2022 academic year, the “Digital Skills” project is planned to cover 16 cities and districts.

The project is expected to involve 190,000 pupils studying in 250 schools in Baku, Sumgait, Ganja, Shaki, Shirvan, Shamakhi, Lankaran, Bilasuvar, Mingachevir, Khachmaz, Yevlakh, Sabirabad, Salyan, Shamkir, Goychay, Shabran cities, and districts.

It is also not excluded that more than 1,500 teachers will teach in the project.

In addition, it is planned to increase the number of classes in existing schools in the new academic year, as well as to connect new schools in different cities and districts to the project.

It should be noted that, since the 2017-2018 academic year, the “Digital Skills” project has been launched in secondary schools in order to ensure that the students master ICT skills deeply, achieve their purposeful activity in the information space, and formulate them as individuals with a competitive and logical mindset.
