

---

Today marks the end of "The First Lego League Azerbaijan (FLL) competition, which has been held since yesterday among schoolchildren in engineering and robotics, organized by the Ministry of Education and the "Edumedia" company at the ADA University (the Azerbaijan Diplomatic Academy).

FLL is a tournament that introduces students to the worlds of science, technology, physics, and mathematics. By participating in this tournament, students gain important skills such as critical thinking, problem solving in novel ways, and teamwork, all of which are necessary for future scientists and engineers.

The tournament's theme this year is "CITY SHAPER." The students, aged 10 to 16, who competed in the tournament in teams, conducted urban planning research using special "Lego Mindstorms EV3" kits, assembled a robot to solve the declared missions, and demonstrated their creativity in programming it.

Today is the event's awards ceremony, and the winners will be awarded.
