
1337.edu.az website was inaugurated for the purpose of providing the increase of awareness on cybersecurity. The main aim of creating the resource is forming the theoretical knowledge and practical skills on cybersecurity, fight against cybercriminals among the users of different age group. At the same time, it is planned to organize the community events and to form healthy environment for internet usage in the framework of the project for the purpose of extension of the cybersecurity understanding in the educational establishments.

Each internet user of different age group may get acquainted with the innovations in the field of information security and share information on different categories by signing up on 1337.edu.az website.

On the website there is "Discussion Forum" section where blog posts on information security are regularly placed by specialists on cybersecurity. As well as, in this section it is discussed significant issues such as "Incident management and responsive measures", "Penetration tests", etc. and their solutions are showed.

It shall be noted that 1337.edu.az resource was established as a result of successful product of "Cybersecurity" training project of the Ministry of Education of the Republic of Azerbaijan directed to improvement of knowledge and skills on cybersecurity and fight against cybercriminals and it is supported by Education System Informatization Department.
