

---

On April 21, the opening ceremony of the STEAM Center was held at the Lyceum with a chemistry and biology bias in the Shamkir district.

The opening ceremony was attended by Minister of Education Emin Amrullayev, head of the Shamkir District Executive Power Rashad Tagiyev and other guests.

The guests who attended the opening ceremony got acquainted with the conditions created for students at the Center.

It was noted that the STEAM Center has areas for students to work in "Robotics", "Art", "Science", CNC and 3D Printing, VR, Unmanned Aerial Vehicles (drone).

The STEAM Center in Shamkir district is designed for use by all age groups and is fully equipped with the necessary innovative technology compatible with STEAM content. Along with the aforementioned school, students and teachers from other schools in the region will be able to take advantage of the opportunities created at the Center. It is expected that during the year about 2500-3000 schoolchildren and students will take part in trainings on various modules at the Center.

It should be noted that in order to ensure accessibility of the STEAM project for all, as well as to implement extracurricular activities for students with special knowledge and skills in this area, to be better prepared for competitions, contests and Olympiads of the world level STEAM centers are created in different regions of the country.
