The conference, organized by the Department for Education Informatization System of the Ministry of Education, was attended by directors of schools, workers of educational departments and teachers of Khachmaz, Guba, Gusar, Shabran, Siyazan and Khizi districts. Moreover, representatives of companies, such as Madad, Azedunet and Ultra, which are collaborating with the Ministry of Education within the State Program on Informatization of Education System in the Republic of Azerbaijan in 2008-2012, were among attendees. In order to share the positive experience achieved due to measures implemented within the State Program, leading teachers in the use of ICT of Baku schools have also attended the conference.

Speaking at the opening of the conference, director of Guba district Education Department Suleyman Aslanov noted the important role of the education in our lives and underlined the application of modern technologies made it possible to organize the education at the highest level. According to him, they have paid special attention to the use of ICT in Guba.

Head of Department for Education Informatization System of the Ministry of Education Samir Mammadov gave information on components of State Program and works done in this area. According to him, the main purpose of steps taken in this direction is the systematic use of ICT in the education. S. Mammadov noted that the use of ICT in the education serves to the development of personnel potential of the country, and from this point of view, the great deal of attention is paid to this area by the government. He informed that such conferences will be organized in other regions of the country in order to inform educators on the use of modern technologies in the education.

Director of MADAD Organization Elbrus Zarbaliyev on his presentation entitled "New educational opportunities, use of world experience" talked about involving of teachers in training workshops held within the State Program. According to him, in cities, like Baku, Sumgayit, Ganja, Mingachevir, Sirvan and 33 districts were established about 100 training centers. What is more, 55,980 educators and administrative management personnel have attended training workshops led by 250 tutors.

Within the conference were held seminars on the themes of "Internet as a source for Education", "Creation of e-Educational recourses", "E-school project" and "Changes in the education and learning opportunities."
