

---

An infotour to the STEAM Innovation Centre was organized on 23 February.

The infotour was attended by media executives, prominent members of the public and media representatives.

Participants were first informed about the centre. It was noted that the aim of the STEAM Innovation Centre, which is an extension of the "STEAM/Azerbaijan" project, is to channel students' potential and interests into the work of serving society, encouraging students to learn. Pupils and students of different ages who apply to the centre will improve their 21st-century skills: creativity, development of cooperation as well as the use of modern ICT equipment using different programming languages.

At the centre, guests were introduced to the Idea/Workshop, the flight simulator called "In the Air with Numbers", as well as "Science on a Sphere", "Illusions and Physical Exhibits", "Virtual Reality" and "Simple Programming" and other rooms.

During the infotour, questions of interest to participants were answered.
