Graduates, who were not able to receive a document on complete secondary education over the past years, are undertaken the exam at 4 exam centers.

According to the rules, 120 questions should be answered within 3 hours on complete secondary ededucation level. The total number of questions at the final examination of XIaclasses has remained un unchanged, (but there were some changes on different subjects). Thus, the number of questions in mother tongue and mathematic has decreased from 25 to 21, in natural sciences (chemistry, biology, plphysics, and geography) has increased from 10 to 12 questions. The number of questions on history arandoforeign language subjects (15) has remained unchanged. The test book that will be used in final exams was prepared in 18 variants, which means that each pupil at class will receive one variant.

On June 18, at IX classes of Baku will be held centralized final examination for general secondary education level. 35026 pupils will undertake an exam at 75 exam centers. They should answer to 50 questions in mother tongue and mathematic subjects (each contains 25 questions) within 90 minutes. The test book that will be used in final exams was prepared in 12 copies.

Pupil answering correctly from 20 to 50 per cent of questions from each subject will receive "3", from 50 to 80 % - "4" and more than 80% - "5."
