
The 57th International Mendeleev Chemistry Olympiad was organized in Astana city, Kazakhstan.

The representatives from over 20 countries participated in the Olympiad, which consisted of theoretical and practical parts.

Our national team successfully participated in the Knowledge Olympiad and won another medal for our country. Deniz Sattarli, a 11th grade student of the Baku Turkish Lyceum of Türkiye Diyanet Foundation, was awarded a bronze medal. In addition, the organizers of the Olympiad presented a special gift to Hamid Khalilov, a 11th grade student of the Ganja physics-mathematics and informatics biased lyceum.

We congratulate our students and wish them success in their subsequent competitions!
