The IV Congress of the Turkic World Mathematical Society (TWMS) held in Baku has finished.

The Congress organized by the Ministry of Education, Azerbaijan National Academy of Sciences and Applied Mathematics Scientific Research Institute of Baku State University was attended by mathematicians from 20 countries of the world, including, Azerbaijan, Turkey, Kazakhstan, Uzbekistan, Kyrgyzstan, Turkmenistan, France, USA, Russia, Great Britain and other countries, AzerTac reports.

Speakers highlighted the President Ilham Aliyev attaches great importance to the development of science and education, and talked about the importance of these fields in the contemporary world, as well as about the activity of TWMS.

At the section meetings of the congress was given and discussed 314 presentations devoted to the theoretical and applied problems of mathematics, and to the teaching method of this science.

Moreover, members of the Board of the TWMS were elected at the congress. The Minister of Education of Azerbaijan, Misir Mardanov, has been elected a president, academician Fikrat Aliyev (Azerbaijan), Prof. Etibar Panahov (Turkey), academician Amanbeck Jaynakov (Kyrgyzstan), and Prof. Nargozu Danayev (Kazakhstan) vice- president of TWMS for the next three years.

The former president of TWMS, Science and Education Minister of Kazakhstan, academician Bakytzhan Zhumagulov has been elected an Honorary President of the Society. Moreover, the fund of the TWMS was established and academician Fikrat Aliyev was elected its president.

The Turkic World Mathematical Society was established in 1999. Mathematicians from Azerbaijan, Turkey, Russia, Kyrgyzstan, Kazakhstan, Uzbekistan, China, USA, Mongolia and European countries are members of the organization. The first Congress of the Society was held at Firat University (EElazig, Turkey) in 1999. The second Congress was held at Sakarya University (Adapazari, Turkey) in 2007, and the third Congress at Kazakh National University named after Al-Farabi (Kazakhstan, Almati) in 2009.

The main goal of the organization is to achieve the integration of the world's scientists of Turkish origin, help them to establish and strengthen the cooperation with the renowned scientific centers. Moreover, it is aiming to redirect new scientific achievements to the economic development of Turkic-speaking countries, as well as help scientists of Turkish origin to become a world famous.
