For the first time, Azerbaijani school children won a medal at the International Science and Engineering Fair of the USA.

Said Aslanov and Ibrahim Allahverdiyev, X grade students of World School under the the Khazar University, won a bronze medal in the “Biomedicine and Health Sciences” category at the competition held in California on May 11-17. In addition, Nijat Taghizada, a X grade student of the same school, and Khazar Huseynov, a X grade student of the educational complex No1 132-134, were awarded a special prize in the “Robotics” category.

Note that the International Science and Engineering Fair (ISEF) is the world's most prestigious science competition for students.
