The Ministry of Science and Education held a meeting with the management team of of “Presight” company, one of the leading technology companies in the United Arab Emirates, which is part of the G42 group of companies.

The meeting was attended by Minister of Science and Education Emin Amrullayev, Chief Executive Officer at the “Presight” company, Thomas Pramotedham, and other representatives from both sides.

During the meeting, the “Presight” company presented solutions adapted for the education sector and based on innovative artificial intelligence technologies. The parties also exchanged views on activities carried out within the framework of current cooperation and the future prospects for its development. One of the main topics of discussion was how to use the presented AI-based technological solutions to improve the “Digital School” platform.

Meeting participants emphasized the importance of expanding cooperation in the digitalization of education and application of innovative technologies.
