A series of meetings were held at the headquarters of “Huawei” company during the working visit of the Ministry of Science and Education delegation to the People's Republic of China.

The parties discussed existing opportunities for cooperation in the field of information and communication technologies, in particular, innovative solutions for education management, as well as the company's advanced practices in research and development.

Representatives from “Huawei” company provided a comprehensive overview of their latest technological innovations in artificial intelligence, digital transformation strategies, and global projects being implemented in this area. Specifically, discussions covered the establishment of innovative laboratories, the organization of joint research programs, personnel training, and mechanisms for knowledge transfer within the framework of cooperation with educational and scientific-research institutions.
