
450 pupils, representing all regions of the country, solve open-ended questions in different rooms allocated for the subjects such as biology, geography, mathematics, physics, Azerbaijani language and literature, history, chemistry and information science.

In order to ensure transparency, the pupils' answers sheets will be encoded and delivered to the jury. The results will be announced after the appropriate checking and will be placed on the official website (www.edu.gov.az) and Facebook page (<https://www.facebook.com/tehsil.gov.az>) of the Ministry of Education.

On April 20, during the first half of the day, students, dissatisfied with the results, will have an opportunity to discuss the results with the jury.

It should be noted that this year, the implementation of subject Olympiads is accompanied by a number of innovations. The event will be held within 3 days and in order to motivate the participants for knowledge competition, they will stay at the hotel Kempinski Badamdar and all conditions will be created for the effective organization of leisure during this period.

Geography was included in the list of Olympiad subjects this year. Unlike previous years, Olympiad questions were not applied openly, but were presented in the form of test at the initial stage in order to ensure transparency and fair evaluation.

This year, for the first time, Subject Olympiads are held in three stages. The first - regional stage of the Olympiad was attended by 22000 pupils on eight subjects. The semi-final stage, organized for the first time from this year with the participation of 3700 pupils, was held in 11 centers located in Baku, Sumgayit, Ganja, Shirvan, Sheki, Mingachevir, Lankaran, Shamakhi, Aghdash, Khachmaz and Nakhchivan. Then the finalists were determined.

About 240 out of all students, participating in the final stage, will be among the winners. In addition, for the first time, the champion will be determined on the nomination "The winner of the winners" among the participants in each subject and candidate students will be selected to take part in international Olympiads in any subject.
