

---

The meeting was attended by the students representing Baku, different regions of the country - Ganja, Absheron, Barda, Gabala, Jabrayil, Zagatala, Gubadly, as well as other regions and cities.

Congratulating the participants of the meeting on the occasion of winning the title of student, Mikayil Jabbarov recommended that the success formula must be sustainable and they should be high-quality personnel and specialists loving their work. At the same time, the Minister urged them to take an active part in the public and cultural life of the higher education institution where they will receive education and to improve their knowledge and skills.

Drawing attention to the improvement of academic achievements in the last two years, Mikayil Jabbarov noted that the average score for admission to higher education institutions increased significantly.

During the meeting, the Minister answered the students' questions and exchanged views with them. Ibrahim Ahmadov, who has finished secondary school with a gold medal, has become the bronze medalist of the Republican Mathematics Olympiad, has entered ADA University with 700 points, expressed his opinion about the application of curriculum in secondary schools and its advantages. Nurlan Majidov, who has entered Azerbaijan Medical University with 700 points, and Narmin Guluzade, who has become the silver medalist of the subject competition in biology, has finished secondary school with a gold medal, has entered the University with 695 points out of 700 points, shared their views on education abroad. Jamil Imranov, who has been the participant in the Republican contest "Scientists of Tomorrow", has finished secondary school with a gold medal, asked questions about SABAH groups.

Providing detailed information about the State Program on education abroad, Mikayil Jabbarov spoke about the prospects for the development of higher education in our country. Noting that the establishment of SABAH groups is an important step forward in this way, the Minister emphasized that the environment for innovation would be expanded in higher education institutions in the near future within the framework of international projects.

Mikayil Jabbarov recommended to our students to represent Azerbaijan worthily and to demonstrate active citizenship, regardless of studying abroad or within the country.

Zaur Velizade, who was the winner of the Republican competition on the subject of Biology, finished secondary school with a gold medal, who was from Mingachevir, was interested in the rating of higher education institutions in the labor market and Sergey Styopin, who was the winner of the Chemistry Olympiad, finished the lyceum named after academician Zarifa Aliyeva with a gold medal, entered the University with 644 points out of 700 points, was interested in the presidential scholarship.

The Minister answered all the questions of the students in detail and expressed his attitude to the issues concerning them.

At the end of the meeting, Mikayil Jabbarov noted that the great opportunities were created for learners and urged each student to take advantage of the opportunity created by our country.
