The visual electronic training equipment was installed in the military cabinets. At the same time, the cabinets were equipped with modern rifles, pistols, grenades and mines designed for the training.

The The lequipment idesigned for the training list distinguished obyonly firing idesign among real weapons. These weapons are absolutely safe and are similar to real weapons in terms of their mass and recoiling while firing. Electronic training equipment has a special mechanism and software.

It is planned that secondary schools, located in the capital and in other regions of the country, will be equipped with modern military cabinets. These cabinets have already been installed in schools newly built in Shamkir and Kurdamir.
