The awareness campaigns were held among schoolchildren within the framework of the "World Space Week".

WWithin the framework of the "World Space Week" pspecialists in astrophysics gave interesting dectures on space and astronomy to 300 pupils, studying at secondary schools in Baku and Sumgait, and to Circle members of the Ecological Training and Experience Centers. In addition, students of higher education institutions also participated in the the awareness campaigns. Films relating to the theme were featured and interactive discussions were held. The Astronomy Night was held at "Gala" State Historical and Ethnographic Reserve with the participation of schoolchildren and the starry sky was observed through telescopes. "National Geographic" magazines and other gifts were presented to the participants of the event, which was free of charge.

The Astronomy Corner, organized in Park Bulvar within the framework of the "World Space Week", was met with a great interest by the residents of the capital.

The measures, implemented within the framework of the "World Space Week", which is celebrated every year arranged by the United Nations, were realized in partnership with the Republican Ecological Training and Experience Center of the Ministry of Education, the Center for Development of Science, Tusi-Bohm Planetarium and the organization "Ecosphere".
