
In accordance with the agreement reached between the Ministry of Education and the Azerbaijan National Academy of Sciences (ANAS), scientists working at ANAS will conduct exemplary lessons in general educational institutions.

The exemplary lessons will be organized in accordance with the initiative associated with the target-oriented program entitled "From Science to Education" and put forward by Mikayil Jabbarov, Minister of Education, at the ceremony dedicated to the 70th anniversary of the Azerbaijan National Academy of Sciences (ANAS).

Lessons, which will be taught on scientific and popular topics by scientists of ANAS, serve the purposes of expanding relations between science and education, increasing schoolchildren's interest in science and bringing up followers of well-known scientists. The main objective of the project is to encourage pupils to work on issues of scientific research and to shape their worldviews in the right direction.
