The "Digital Skills" --- a joint pilot project of the Ministry of Education and International Algorithmic Company, was presented at The Moscow International Education Fair (MIEF) 2019 on April 10.

Deputy Minister of Education Firudin Gurbanov got acquainted with the stand at the exhibition.

Representatives from educational institutions of several countries were interested in the project stand.

F Fakhri Gurbanov, head of the Digital Skills project, and Founder and Chief Executive Officer of Algoritmika International Education Company Andrey Lobanov participated in panel discussions and roundtables, which were held within the framework of the program.

Moscow International Education Fair is the largest event in the field of education among CIS. The topic of the MIEF 2019 is "New Subjectivity of the Education".

According to organizers, about 650 events were held at the International Education Center-2019. Totally more than 1000 experts, 400 exponents and about 50,000 visitors came together at the exhibition.

37 members from 28 international delegations attended Moscow International Education Fair in 2019.

It should be mentioned that the project "Digital Skills" is being implemented since 2017. The project covers 65 schools in Baku, 6 schools in Ganja, 2 private educational institutions, as well as more than 26 thousand students.
